Go Rebar – Easy Order Entry in the Cloud

Thursday May 7

Learn how easy it is to get started with aSa's cloud order entry system. Go Rebar is a great tool for your customers, salespeople, outside detailers, and even in-house staff.

MicroStation & ProStructures Bentley Connect New Features

Thursday May 14

Get familiar with Connect. Topics include: Client Connect login, ribbon bars, popup shortcuts, keyboard shortcuts, and Search & Connect Advisor.

Emailing Invoices in Rebar Financials

Tuesday May 19

Your presenter will guide you step by step through setting up your system for email delivery, sending invoices electronically, and verifying that the process worked correctly.

Using Production and Optimized Shearing

Thursday May 21

See how you can save time and reduce scrap using aSa Production tools. You'll also learn about new features like printing tags on demand from the TouchTracker.

Working with the aSa Opto-Shear Console

Wednesday May 27

aSa's Opto-Shear Console has several modes and screens to accommodate all types of work, from pre-planned optimized runs to unexpected walk-in orders. Get a comprehensive tour of console functionality in this helpful webinar.

New Features of aSa & MicroStation Connect

Thursday May 28

Get up to speed with new Place Bend Shape options, as well as 2D and 3D takeoff. You'll also get best-practice advice for exporting and archiving your files.

Rebar Financials Contract Pricing & Reporting

Tuesday June 2

Know exactly where you stand with every job. Learn how Rebar Financials contract tools and reports keep you up to date throughout the project lifecycle.

Advanced Estimating Tools

Thursday June 4

Dig deep into aSa Estimating. Your presenter will teach you about packages and macros; advanced reporting options; time-saving editing tools; and more.

Printing & Customizing MicroStation Connect

Tuesday June 9

Learn how to batch print from aSa 2D and 3D detailing packages. This session also covers how to customize the Connect environment, including ribbon bars, spacebar popup shortcuts, and keyboard shortcuts.

Rebar Financials Process Period End

Thursday June 11

In this webinar, you'll get proven instructions on the best way to close and balance each Rebar Financials module at period end. You'll also learn how to reopen a closed period.

Working with Material Tracking and Bundle Inventory

Tuesday June 16

See how barcode scanning modules help you track material, update on-hand inventory, and manage heat information automatically. Not using our tracking modules? Register anyway and see how easy it can be.

Sage 500 Explorers

Thursday June 18

Sage Explorers put a wealth of need-to-know information at your fingertips. Find out how to drill into Rebar Financials data for powerful insight into your business.
